Minerva Infosolution

IT Infrastructure Solutions

Rental IT Services – All Types of Equipment: Rental IT services offer short-term access to all types of IT equipment, including laptops, servers, and networking devices.

Structured Network Cabling Solutions : Structured network cabling solutions provide a standardized infrastructure for efficient and organized communication between devices and networks.

Network Security Solutions : Network security solutions protect systems and data by preventing unauthorized access, detecting threats, and ensuring secure communication across networks.

MacBook / laptop AIO : MacBook/laptop AIO solutions offer versatile, portable computing devices with integrated features for seamless performance and productivity.

Power Backup Solutions : Power backup solutions provide reliable energy support to ensure uninterrupted operations during outages, safeguarding critical systems and data.

Printer UPS Desktop office work station : Printer, UPS, and desktop office workstations provide a complete setup for efficient office operations, ensuring reliable performance, power backup, and seamless printing solutions.

E-waste material : E-waste material refers to discarded electronic devices and components, including computers, smartphones, and appliances, requiring proper recycling to minimize environmental impact.

Security Surveillance – Access Control & CCTV : Security surveillance through access control and CCTV ensures controlled entry and constant visual monitoring for enhanced safety and security.

Minerva Infosolution

IT Infrastructure Solutions

Server and Network Enclosed Solution : A server and network enclosed solution combines servers and networking components in a compact, secure system for efficient and streamlined operations.

Data Centre Setup : A data center setup provides a secure, scalable environment for managing and storing critical IT infrastructure.

Wired or Wireless Solution : A wired or wireless solution provides a reliable and efficient method for connecting devices and networks, depending on the specific needs of the environment.

Power Backup Solution : A power backup solution ensures continuous operation by providing reliable power supply during outages, safeguarding critical systems and data.

Design and Deployment of Network Infrastructure : We involve creating and setting up a structured system to connect and manage devices, ensuring seamless communication and data flow.

Network Security Solution : A network security solution protects data and systems by securing networks against unauthorized access, breaches, and cyber threats.

Structure Network Cabling Solutions : Structured network cabling solutions provide a standardized, organized infrastructure for efficient and reliable communication between devices within a network.

Data and Voice Project : A data and voice project integrates communication solutions for managing both voice and data networks, ensuring seamless connectivity and collaboration.

IT Infrastructure Solutions

Security Surveillance Access Control & CCTV : Security surveillance with access control and CCTV ensures a comprehensive solution for monitoring, securing, and managing physical spaces.

Server and Network Enclosed Solution : A server and network enclosed solution combines servers and networking equipment within a secure, compact environment for efficient operations.

AV solution & Board Room Integration : An AV solution and board room integration provide a seamless setup for audiovisual presentations, collaboration, and communication in meeting spaces.

AV & Telephony Solution : An AV and telephony solution integrates audiovisual and voice communication systems for enhanced collaboration and efficient communication.

UPS (Uninterruptible Power Supply) : A UPS (Uninterruptible Power Supply) provides backup power and protects devices from power outages, ensuring continuous operation and data security.

Junk Material : Junk material refers to discarded or obsolete items that are no longer in use, often requiring proper disposal or recycling.

Office Workstation : An office workstation is a dedicated space equipped with computers, peripherals, and necessary tools for productive work.

Physical Security Solutions : Physical security solutions provide protection for assets, facilities, and personnel through systems like access control, surveillance, and alarm systems.
